MOCAfellows

MOCAfest is launching its first MOCAfellows programme that is now a core component of the existing festival. The fellowship starts with three days of creative business and professional development workshops created especially for artists. Following this, the fellows will join the festival artists for three days of MOCAfest, including time to collaborate and create together with featured artists. The end goal is to give artists the key skills they need in order to plan and launch successful careers as artists as well as learn from other artists and arts professionals. Artists will also have the opportunity to perform, present and exhibit their work at MOCAfest.
